

# Triplex Sales Introduces...

## On Demand: *Field Service*

Triplex is excited to announce a capability expansion to our On Demand Program— Field Service. With multiple factory certified technicians, we're here to help.

Our On Demand Field Service Program Offers the following:

- Multiple Factory trained and certified technicians for PHEs, SSHEXs, evaporators, and homogenizers, backed up by in-house engineering expertise
- Services include initial site installation, start up, preventative maintenance, equipment health assessment, classroom & hands on training, and 24/7 emergency breakdown and repair
- Automation and process consultation also available
- Technicians only utilize factory OEM parts

**Call us today to schedule  
your equipment service.**

Triplex On Demand Field Service Program consists of four factory certified technicians that have expertise in most common brands of PHE, SSHEX, evaporators, and homogenizers!

Backed up by a dedicated engineering team, our technicians follow a simple process to ensure your equipment is serviced in a safe and efficient manner.

- Once on site, techs complete required safety training, lock out tag out procedures, and execute an initial evaluation with site personnel.
- Techs then disassemble the equipment, removing & replacing all wear components, before cleaning, sanitizing, and reassembly.
- If included in the scope of work, technicians stay for equipment start up and/or hands on operator training and provide detailed service summaries & future considerations.
- We service & train end users on a complete range of process equipment including PHEs, SSHEXs, Evaporators, homogenizers, pumps, and valves.

Triplex On Demand Field Service Program delivers the manpower & expertise you need to service and support of all your process needs!
